# VENUE & CITY

Paris is the very popular capital city of France. Paris is also named as the "City of Light". Paris is located at the mid of the Ile-de-France area and covered by the Seine, Oise and Marne rivers. The city is ring-shaped with great forests of beech tree and oak tree; They are named as the "Lungs of Paris", for they support to purify the air in the deeply commercial region.

Paris appeared as the major and important city of the western world. It's developed very effectively from the professional point of view. It had developed as the pivot for business, trade, knowledge, fashion and arts. It has still preserved its position today. The city is completely overloaded with fascinating and beautiful marvels. One of the greatest prominent tourist attractions is the Eiffel Tower.

The second most luxurious city in the world is Paris and it has major railway, highway and air-transport hub systems. Paris has engaged its position as a centre for education and intellectual researches. There are a thousand things to do and see in Paris, and no expense of time will avail. Paris has a distinguishing Western European oceanic climate. The general climate throughout the year is mild and moderately wet.

In the city of Paris, Healthcare and emergency medical service are provided by the Assistance Publique – Hôpitaux de Paris (AP-HP). It is the largest hospital management system in Europe. It provides healthcare, education, research, prevention and emergency health services.

Paris has advanced a character as the "City of Art". Painting and monument became the pride of the French monarchy and the French royal family specially made many Parisian artists to decorate their palaces through the French Baroque and Classicism era. Thus, it is of little wonder that this is not only one of the world's most beautiful, fashionable and romantic cities, but that it is also brimming with fantastic historic sites with delightful gardens and royal monuments which are absolutely going to be a feast for our eyes.
