THEME: THE FUTURE OF PATIENT CARE IN THE DIGITAL CARE

The 5th Global Congress on Digital Health, Patient Care and Future Nursing (Digital Health 2023) will be the hybrid conference which allow participants to take part in both ways i.e. in-person and virtual. Digital Health 2023 is schedule to be held in the beautiful city of Istanbul. For 2 days we will join to learn, share and network with the healthcare force from across the globe.

WELCOME MESSAGE

PROF. DR. SEVAL AKGUN, MD, PHDS
CONGRESS CHAIR

The COVID 19 pandemic causes radical changes in many areas of our lives, has deeply affected healthcare professionals and all health systems, who are the backbone of this struggle, and also revealed the importance of digitalization. The nursing industry is also changing at a rapid rate. Nurses are an unstoppable force.

Therefore, in collaboration with the Society of Healthcare Academicians invites abstract proposals for paper and poster presentations for the **5th Global Congress on Digital Health, Patient Care and Future Nursing**, This is being planned in **Istanbul, Turkey** from **September 14-15, 2023**.

The medical profession has long been concerned with whether the care given to and perceived as being good for the patient achieves its goal, or at least does better than harm Within this context patient safety is crucial, since it can potentially influence both patients' health status and medical outcome. The current, old processes are not working anymore. The system is unmanageable and unusable, full of mistakes and errors, founded on empiricism rather than evidence of efficacy, and is way too expensive. Therefore, promoting patient safety goes hand in hand with person centered care. A whole new science has grown up around patient safety to try to explain the many circumstances, situations and occurrences that can put patients at risk It may not be a single issue that causes the problem, but a combination of factors Patient safety is the cornerstone of high-quality health care. Much of the work defining patient safety and practices that prevent harm have focused on negative outcomes of care, such as mortality and morbidity.

Nurses are the largest group of healthcare providers in the world offering direct patient care and critical staff to the surveillance and coordination that reduce such adverse outcomes. In the past, we have often viewed nursing's responsibility in patient safety in narrow aspects of patient care, for example, avoiding medication errors and preventing patient falls. While these dimensions of safety remain important within the nursing purview, the breadth and depth of patient safety and quality improvement are far greater. The most critical contribution of nursing to patient safety, in any setting, is the ability to coordinate and integrate the multiple aspects of quality within the care directly provided by nursing, and across the care delivered by others in the setting.

This congress will provide opportunities to discuss the current challenges in healthcare, provide an insight on latest trends and to explore the future of patient safety and healthcare science. The congress will assist the participants in understanding, developing and implementing an effective patient safety program in their organizations and prepare them for future professional challenges From invited plenary presentations, selected workshops, oral and poster presentations, participants will have opportunities to explore collaborative approaches to quality improvement among users, providers and donor organizations, and to examine new systems and ideas that reach across traditional boundaries.

With the theme celebrating “Sharing solutions, building a healthy world” this international nursing care and patient safety conference will be of value to

- Physicians & Digital Healthcare experts
- Nursing Staff, Registered Nurse (Nurse Practitioner, Clinical Nurse, LPN, Nurse Case Manager, ICU Nurse etc
- Academic staff (Dean, HODs, Professors)
- Patient Safety Managers
- Quality Patient Safety Professional
- Pharmacovigilance Specialist
- Students
- Professionals
- Healthcare Providers and their representatives

The **Digital Health 2023** scientific program will cover all the trending topics such as Telehealth and Technology in Health Care, Traveling Nurses, Advanced Patient Care, Nursing Care, Patient Safety and Risk management, Healthcare management, Primary Care, Adverse drug reactions and reporting, Blood safety, Factors associated with safety of patient, Infection control, Nursing informatics, Digital Hospital, Nursing Education Research, Geriatric Safety, Holistic care and many more.

From invited plenary presentations, selected workshops, oral and poster presentations, participants will have opportunities to explore collaborative approaches to patient safety among users, providers, and donor organizations, and to examine new systems and ideas that reach across traditional boundaries.

As **Digital Health 2023** we are looking forward with great enthusiasm and interest to meeting each one of you and working with you during this conference period. The location is special, **Istanbul, Turkey**. We hope you will join us in **Istanbul** in **September 2023**.

Best Regards,

PROF. DR. SEVAL AKGUN MD, PhDs, MSc, CPHHA
CONGRESS CHAIR

Professor of Public Health and Medicine, Baskent University School of Medicine,
Chief Quality Officer, Baskent University Hospitals Network, TURKIYE
International Accreditation Surveyor and Patient and Employee Safety Consultant in Health Care and Higher Education,
Adjunct Professor, University of North Carolina-Pembroke, USA
President, Health Care Academician Society

CALL FOR ABSTRACTS

The scientific committee of the **Digital Health 2023**, to be held on **September 14-15, 2023** in Istanbul, Turkey invites you to submit an abstracts for an oral or poster presentation on a wide range of topics related to nursing care and patient safety, including but not limited to:

- Advance Nursing Practice
- Advance Patient Care
- Augmented AI
- Big Data in Healthcare
- Bioinformatics and Digital Health
- Block Chain Technology
- Clinical Nursing
- Digital Health Technologies
- e-Health & m-Health
- Forensic & Legal Nursing
- Future of Nursing
- Health Information System
- Healthcare Artificial Intelligence
- Healthcare Informatics
- Tele-health and Technology
- Leadership skills
- Women's Health & Patient Safety
- Digital Hospitals
- Hospice and palliative medicine
- Infection Control
- Nursing Informatics
- Nursing Education
- Nursing Leadership
- Oncology Nursing
- Palliative Care
- Patient Care Technologies
- Pandemic and challenges
- Infection control
- Quality improvement in nursing care
- Patient-centered care
- Holistic Nursing
- Travel Nurse and e-Health
- Technology and Nursing Science
- Medication safety and pharmacovigilance
- Wearable Technologies

SUBMISSION GUIDELINES:

- Abstracts should be no longer than 250 words.
- The abstract should include the title, author(s) and the institution(s) of the author(s)
- Abstracts should be submitted via email to info@globalnursingconferences.org
- The deadline for 1st round abstract submissions is **July 15, 2023**.

FOR SUBMISSION & MORE INFORMATION:

- SUBMISSION: <https://globalnursingconferences.org/abstract>
- Whats App: [+1-210-756-1988](https://wa.me/905312107561988)
- Email: info@globalnursingconferences.org

Presenters and session organisers **MUST** register for Digital Health to confirm attendance. Presenters/session organisers who have not registered by this date will have their abstracts removed from the programme.

We look forward to receiving your abstract and to welcoming you to **Istanbul** in **Sep 2023** for a stimulating and informative conference on digital health and future nursing.

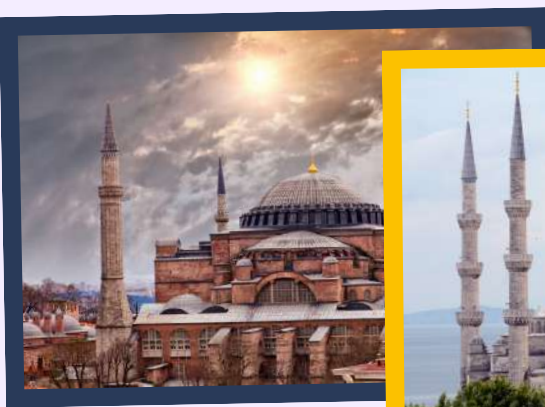

Why Istanbul?

Istanbul is a major tourist destination in Turkey, and the city has seen a steady increase in the number of visitors in recent years. According to the Turkish Ministry of Culture and Tourism, in 2019, the number of tourists visiting Istanbul was approximately 15.5 million. This number increased to 15.8 million in 2020, but decreased in 2021 due to the impact of COVID-19 pandemic.

Istanbul is home to a large and dynamic healthcare market, with a wide range of hospitals, clinics, and medical centers catering to the needs of its population. The healthcare market in Istanbul is also driven by the significant number of medical tourists the city receives, who come to the city for its high-quality healthcare services. The healthcare infrastructure in Istanbul is well-developed, with many modern hospitals and clinics that offer a wide range of services, from general medicine to specialized care. The healthcare market is also supported by a strong pharmaceutical industry, which produces and distributes a wide range of drugs and medical supplies. Additionally, the city is also home to a number of medical research centers and universities, which contribute to the advancement of medical knowledge and technology.

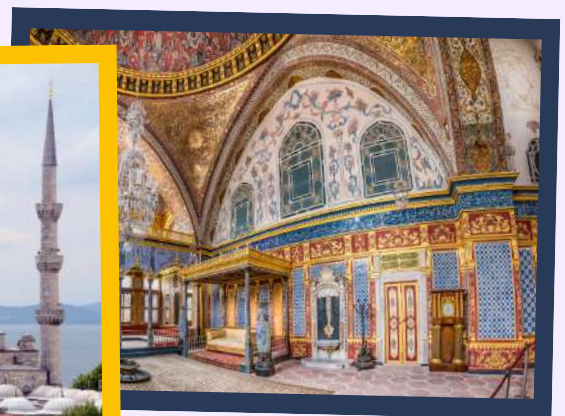

Istanbul, Turkey is a popular tourist destination known for its rich history, culture and stunning architecture. The city straddles two continents, Europe and Asia and offers a unique blend of Eastern and Western influences. The city's most famous attraction is the Hagia Sophia, The Blue Mosque is another famous landmark, known for its blue tile work and six minarets. The Topkapi Palace is a must-see for history buffs, as it was the primary residence of the Ottoman sultans for 400 years. The Grand Bazaar is a unique shopping experience where visitors can find anything from handmade carpets to jewelry, spices and souvenirs. The Bosphorus Strait is also a popular tourist spot, where visitors can take a boat tour to see the city from the water and admire the Ottoman mansions and palaces that line the shore. With its vibrant culture, historical significance and beautiful landscapes, Istanbul is a must-visit destination that offers something for everyone.
